PROFILE

Second-year Computer Science & Engineering student at Reva University with interests in software and web application development, problem solving, and computer vision. Building programming fundamentals through practical projects and coding practice, with a long-term goal of becoming a software developer.

EDUCATION

Reva University

Computer Science & Engineering | Second Year, Third Semester

Bengaluru, Karnataka

TECHNICAL SKILLS & AREAS OF STUDY

Programming: C, Java, Python

Web: HTML, web application development

Computer science: Data structures, problem solving

Data and computer vision: SQL, OpenCV, YOLO, object tracking

SELECTED PROJECTS

AI-Based Intelligent Video Analytics Platform

Smart India Hackathon

Python, OpenCV, YOLO, object tracking

- Worked on a video analytics concept for detecting and tracking people using existing CCTV infrastructure, with analysis of potentially suspicious activity.

Voice-Controlled Home Automation System

- Outlined voice-driven device control with authentication, sensor management, notifications, and a monitoring dashboard.

Employee Payroll Management System

- Designed a system concept for organizing employee records and payroll processing information.

Online Examination System

- Outlined an examination workflow covering login, questions, submission, and result handling.

PARTICIPATION & CODING PRACTICE

Smart India Hackathon participation. Regular coding practice through HackerRank and LeetCode.

HackerRank · LeetCode
